Legal implementation of TP610

Dear Sir or Madam,

Building products used in Germany have to be conform with state building code (Landesbauordnung). In detail since tremco illbruck GmbH is located to Bodenwöhr the Bavarian state building code (ByBO) has to be applied and is equally accepted in all other German federal states.

According to Art. 16 and 17 ByBO there has to be a "Verwendbarkeitsnachweis" (evidence of usability) to use a building product legally. This document is sufficient. One option for such evidence is the so called "Allgemeines bauaufsichtliches Prüfzeugnis" (general appraisal certificate, AbP) as described in Art. 19 ByBO.

Please find attached the AbP for TP610, document number P-NDS04-218.

With regards
